

Operating System

Windows 95/98/ME/NT 4.0/Win 2000/Win XP

- **Computer Components**

- Intel Pentium II 400 MHz processor or better (or equivalent)
- You will need at least 32 MB memory – we suggest as much as you can get.
- Video Card with at least 4 MB RAM
- Sound Card
- Microphone because we do support audio ☺

- **Video Camera**

- Any video camcorder with an RCA Out Jack is highly recommended.
The best quality will come with a Camcorder and the use of a video capture card.
- USB web cameras don't require a video capture card but won't provide the best video quality.
- Intel's USB web cameras are not compatible with our software.

Broadband Internet Connection

DSL, Cable modem, or better (You will need to show proof of your connection)

If you have questions or need technical support regarding your hardware please email **TechSupport@Streamray.com** or call us at 877.434.0599 and someone will be happy to help you.

(Video Capture Card

Highly recommended but optional if you are using a USB web camera.

We suggest the "Winnov Videum". For more info go here:

<http://www.winnov.com/products/capture/index.htm>.

—Streamray will ONLY provide technical support for the "Winnov Videum"

—Cards that are **NOT** compatible with our software: any video capture card made by ATI, 3DFX Voodoo III 3500)
